

## Integrated Report - Reporting Categories

Color	Integrated Report Category	Description
blue	1	- Waters are attaining all water quality standards
green	2	- Waters are attaining the water quality standards for the single pollutant assessed
yellow	3	- There is insufficient information to determine if water quality standards are being attained for the pollutant indicated
orange	4a	- Waters are impaired and have a completed Total Maximum Daily Load (TMDL)
purple	4b	- Waters are impaired but do not require a TMDL, a technological solution has been initiated (e.g. sewage plant upgrade, NPDES permit enforced)
gray	4c	- Waters are impaired but not for a conventional pollutant and thus do not require a TMDL (e.g. habitat alteration such as stream hardening/channelization)
red	5 (historical 303(d) List)	- These waters are impaired and require that a TMDL be developed
